## EXPERIENCE

### Rainforest Partnership – Austin TX

Web Developer - Volunteer

Apr 2017 - Current

Currently i'm working as the lead developer and responsible for creating a new website, a new University Partnership portal and streamlining digital and development operations.

- Using developer tools to solve development challenges with Rails, Node, PHP, React, Angular, HTML5, CSS3, Bootstrap, JQuery, Javascript, AWS and/or Firebase
- Creating University Partnership portal to launch new international grassroots program
- Developing, designing and testing new site and apps using TDD, Git and Agile workflow
- Collaborating with all levels of individuals from board members to volunteers to solve organizational challenges, streamline communication and introduce innovative solutions

### Federated Media – Austin TX

Sales Operations Analyst

Jul 2014 - Jul 2016

Collaborated with engineering, sales and finance teams to complete Salesforce migrations and streamline operations during three acquisition and one mergers.

- Worked with engineering, sales teams and management to implement custom CRM dashboards providing sales reps additional insights, resulting in increased sales activity.
- Oversaw and executed the migration of multiple Salesforce instances during acquisitions.
- Maintained weekly, monthly and quarterly performance and forecasting reports for AEs.
- Monitored all Salesforce request for 100+ users and four organizations.
- Streamlined sales leads process resulting in immediate \$30k savings.

### General Atomics Aeronautical Systems – San Diego CA

Accountant I

Dec 2011 - May 2014

Played an active role in the company's migration, testing and implementation of SAP while completing various routine accounting responsibilities.
