## EXPERIENCE

### Rainforest Partnership – Austin TX

Software Developer

Apr 2017 - Current

Currently, I'm responsible for the development of a new University Partnership application and event websites, while streamlining development operations.

- Oversee full development life-cycle of new applications while incorporating Agile.
- Developing new RESTful app with Ruby on Rails to launch University Partnership Program.
- Created event site with React.js, React Router, Bootstrap and AWS.
- Provide DevOps support for cloud solutions with AWS, Firebase, Bluehost and Postman.
- Manage version control across all projects with Git and Github.
- Integrate with external APIs from Google, Formspree and Twitter, along with others.
- Use Bootstrap and Google Material UI to create mobile first responsive design.
- Convert mockups into working app quickly with Bootstrap, HTML5 and CSS3.
- Integrated new tools to improve project management with Slack, Trello and Google Cloud.

### Federated Media – Austin TX

Sales Operations Analyst

Jul 2014 - Jul 2016

Collaborated with engineering, sales and finance teams to complete Salesforce migration and streamline operations during three acquisitions and one merger.

- Oversaw Salesforce operations for 100+ users and four organizations.
- Implemented custom Salesforce dashboards, increasing sales activity by 20%.
- Migration of multiple Salesforce instances during acquisitions, producing \$30k in savings.
- Optimized lead generation process, increasing conversion rate by 15%.
- Generated weekly, monthly and quarterly performance and forecasting reports.

### General Atomics Aeronautical Systems – San Diego CA

Accountant I

Dec 2011 - May 2014

Played an active role in the company's migration, testing and implementation of SAP while completing various routine accounting responsibilities.
